## MEDICAID RESOURCES

Utah has one of the [highest rates of uninsured children](#) in the nation. Covering kids with health insurance is critical to Utah's communities. Studies have shown that a child's health coverage reduces the number of days parents have to miss work because of a sick child. Children with health insurance stay healthier because they receive medical care sooner and more regularly.

CHIP and Medicaid cover Utah children with complete coverage, ranging from regular doctor visits to emergency care. For no cost, children are able to access preventive and routine care including immunizations, dental cleanings and well-child exams. A family of four can earn up to \$53,000 annually and qualify for free or reduced cost health insurance.
